The software used performs calculations on the basis of more than the two decimal places displayed. Minor discrepancies cannot be ruled out due to further calculations using published results.

The value of a unit is calculated by dividing the entire value of the investment fund inclusive of its income by the number of units. The total value of the investment fund is calculated on the basis of the current market prices of the securities, money market instruments and subscription rights in the fund plus the value of the fund's financial investments, cash holdings, credit balances, receivables and other rights net of its payables. That value will be calculated by the custodian bank.

The net assets are calculated in accordance with the following principles:

- a) The value of assets quoted or traded on a stock exchange or other regulated market shall be determined, in principle, on the basis of the most recently available price.
- b) Where an asset is not quoted or traded on a stock market or another regulated market or where the price for an asset quoted or traded on a stock market or another regulated market does not appropriately reflect its actual market value, the prices provided by reliable data providers or, alternatively, market prices for equivalent securities or other recognized market valuation methods shall be used.

The performance is calculated assuming wholesale reinvestment of distributed/paid-out amounts at their net asset value on the distribution/payment date.

The custodian bank calculates the unit value separately for each unit certificate class. Discrepancies may arise in the annual performance figures for individual unit certificate classes.

Raiffeisen KAG uses the method developed by OeKB (Österreichische Kontrollbank AG) to calculate the fund's performance, on the basis of data provided by the custodian bank (where payment of the redemption price is suspended, using indicative values). Some costs – the subscription fee (not exceeding 2.50 % of the invested amount) and any redemption fee (not exceeding 0.00 % of the sold amount) – are not included in the performance calculation. Depending on their concrete value, they will reduce a performance accordingly. Past results do not permit any reliable inferences as to the future performance of the fund.

Capital market report

At the beginning of the year, the stock markets added to the substantial gains that they had recorded in 2017. A brief but significant downward correction occurred thereafter and since then most markets have moved more or less sideways. Inflation anxiety, a beginning reduction of global liquidity and the threat of global trade wars have weighed on investor sentiment and led to higher market volatilities over the past few months. Emerging market equities in particular have weakened. Euro-area bourses temporarily faced headwinds from political turbulences surrounding Italy. Once again, US equities stand out. Seemingly unstoppable, stock market indices in the USA keep hitting new record highs. Positive economic data and rising corporate profits are fuelling their surge. Bond markets have been facing an increasingly challenging environment for quite some time now. Especially in the USA, yields have risen substantially over the past twelve months, primarily for short and medium maturities. In turn, their yields got more attractive for investors. The rising U.S. yields have also affected European bond markets, albeit to a much smaller extent. Ten-year German government bonds even show a small positive return year to date, whereas Italian government bonds suffered significant losses. Total returns for corporate bonds in Europe oscillate around zero for the current year. Yield spreads over government bonds have widened a bit. Emerging market bonds and currencies have come under pressure this year, notably over the past few months. In a number of cases, country-specific factors played a significant role. In general, though, they were negatively affected by higher U.S. interest rates, a strengthening US-Dollar and a beginning tightening of global dollar liquidity. Among major commodities, primarily oil has advanced this year. In contrast, industrial metals could not add to their gains of the past year. They have weakened further recently, as did prices of precious metals. The US dollar has gained since spring, especially against emerging market currencies. In turn, the euro has retreated somewhat, following a period of significant strength. The US central bank (Fed) has raised the key interest rate in June 2018, for a seventh time in the current interest rate cycle. One or two more hikes may follow later this year. On top of this, the Fed will gradually reduce its enormous bond holdings. However, despite the extremely low starting level, the Fed's overall scope for interest-rate hikes is likely to be much lower than in the past. The decade-long upward trend for bond prices in the USA may well be over, and a long-term trend change could be in the making. This development will most likely rub off on the Eurozone, albeit to a considerably reduced extent. Unlike the US central bank, the ECB is still maintaining its ultra-loose monetary policy for the time being, with negative interest rates and bond purchases. However, it has substantially reduced the latter and will end it in December 2018. Nevertheless, the ECB has signalled that any key interest rate hikes are unlikely to happen before summer of 2019. The unprecedentedly loose monetary policy pursued by key central banks over the past few years reflected a very weak global economic growth trend. However, many regions have now returned to robust growth. Inflation is picking up in several parts of the world. This trend is much more pronounced in the USA than in the Euro area. The impact of a gradual reduction of the generous liquidity supply on global growth and price trends remains to be seen. By historical standards, the yield levels are very low almost everywhere in the world. To date, this "new normal" of consistently low bond yields in the key economic blocs has provided strong support for stock prices. Nonetheless, several stock markets – particularly in the USA – sport rather ambitious valuation levels. They are thus increasingly prone to corrections, especially in case of escalating trade conflicts. The market environment will certainly remain challenging and may once again entail stronger price fluctuations over the next few months. At present, the positive factors still predominate on most stock markets, while most (government) bond markets may continue to experience headwinds over the coming months.

Fund investment policy report

The fund was mainly invested in European government bonds during the period under review. These bonds followed heterogeneous trends. While prices of bonds issued by core countries such as Germany and France changed little given the robust economic development of the Eurozone, Italian government bonds suffered noticeable corrections once the new government formed. By contrast, government bonds by other peripheral states, such as Spain or Portugal, made distinctly positive contributions to the result. Although corporate bonds initially performed much better than comparable government bonds, they lost some ground in the second half of the financial year. Additions of western European currencies had various results. Benefits arising from the British pound were juxtaposed with drawbacks arising from the Scandinavian currencies. The addition of eastern European bonds was clearly beneficial in the period under review. Corrections on the emerging markets in general and the turbulence in Turkey in particular affected the situation. All in all, the value of a unit in the fund declined in the financial year 2017/2018.

Securities lending transactions were entered into in order to generate additional income.

- Nature and value of eligible collateral received by the investment fund versus the counterparty risk:

Under the securities lending master agreement concluded between the management company and Raiffeisen Bank International AG, Raiffeisen Bank International AG is obliged to provide collateral for loaned securities. Sight deposits, bonds, equities and units in investment funds are permitted as collateral. The bonds used as collateral may be issued by sovereigns, supranational issuers and/or companies etc. No stipulations apply in relation to the terms of these bonds. Within the scope of provision of collateral, pursuant to § 4 of the Austrian Securities Lending and Repurchase Agreement Ordinance (Verordnung zu Wertpapierleih- und Pensionsgeschäften, WPV), diversification and correlation with risk diversification achieved through quantitative issuer limits in particular and appropriate liquidity for collateral for the purpose of tradability and realizability will be ensured. Sight deposits are not subject to any haircut. The value of this collateral calculated on each day of stock market trading thus amounts to 100 % of the value of the loaned securities. Other collateral (bonds, equities and units in investment funds) will be valued – likewise on each day of stock market trading – on the basis of a value-at-risk calculation. The maximum foreseeable loss for this other collateral is calculated over a period of three business days, with a probability of 99 % (confidence interval). The value determined plus a markup of 10 % represents the applicable valuation markdown. This valuation markdown will amount to at least 5 % of the value of this other collateral. Recognition of this haircut will entail delivery of the required volume of additional collateral on each day of stock market trading.

On the reporting date the collateral had the following makeup:

Further information on repurchase agreements

During the reporting period, no repurchase agreements were concluded on behalf of the fund. Accordingly, the information concerning repurchase agreements which is stipulated in § 8 of the Austrian Securities Lending and Repurchase Agreement Ordinance and Art. 13 of Regulation (EU) No. 2015/2365 is not required.

Further information on collateral for OTC derivatives

In accordance with the requirements stipulated in the Regulation (EU) No. 648/2012 of the European Parliament and of the Council on OTC derivatives, central counterparties and trade repositories (“EMIR”), OTC derivatives are collateralized except for a minimum transfer amount, thus reducing the risk of default for the OTC derivative counterparty. Only sight deposits paid into an account kept by a credit institution which is independent of the counterparty were used as collateral during the reporting period. Haircuts are not taken into consideration here. Sight deposits received as collateral are not used to purchase further assets for the fund assets or otherwise reused.

On Aug 31, 2018, only OTC derivatives (forward exchange transactions) were open. Raiffeisen Bank International AG was the counterparty. As per this date, the management company had deposited EUR 250,000.00 of the fund assets with Raiffeisen Bank International AG to collateralize the open positions.

Total return swaps and similar derivative instruments

A total return swap is a credit derivative instrument. Income and fluctuations in the value of the underlying financial instrument (underlying instrument or reference asset) are exchanged for fixed interest payments.

Fixed and variable remuneration components are determined on the basis of these remuneration guidelines.
- Raiffeisen Kapitalanlage-Gesellschaft m.b.H. has established a systematic, structured, differentiating and incentivizing compensation system which reflects the company's values as well as clear and consistent outline conditions. Its employees' compensation comprises fixed salary components as well as variable salary components for some positions. This remuneration – in particular, the variable salary component (where applicable) – reflects an objective organizational structure ("job grades").
- Compensation is determined on the basis of regular market comparisons and in accordance with local remuneration practice. The goal is to encourage employees' long-term loyalty to the company while also promoting their performance and their development within the framework of a management or specialist career path.
- At Raiffeisen Kapitalanlage-Gesellschaft m.b.H., an employee's basic salary (fixed remuneration) is non-discretionary remuneration which does not vary in accordance with the performance of the company (earnings before interest and tax) or of the specific employee (individual target achievement). It primarily reflects relevant professional experience and organizational responsibility, as outlined in the employee's job description as part of his terms of employment. The employee's fixed salary is determined on the basis of his market value, his individual qualifications and the position which he holds at Raiffeisen Kapitalanlage-Gesellschaft m.b.H. Raiffeisen Kapitalanlage-Gesellschaft m.b.H. uses all of the standard remuneration management instruments (e.g. domestic and foreign remuneration studies, salary bands, position grading).
- The employee's variable salary reflects the achievement of company and performance targets which are specified and reviewed within the scope of a performance management process. Employees' targets are specified on the basis of the company's strategic targets, the targets of their organizational unit or department and their function. Target agreements are concluded and the employee's level of target achievement (= performance) is determined through annual performance appraisals ("MBO system").

The target structure at Raiffeisen Kapitalanlage-Gesellschaft m.b.H. differentiates between qualitative targets – which include individual targets or division and department targets – and quantitative targets, e.g. performance and income targets, and also quantifiable project targets. Every manager is also assigned management targets.

Quantitative one-year or multiple-year targets also apply within the scope of the company's core activities of sales and fund management.

- Since the performance period 2015, in accordance with the regulatory requirements a portion of the variable remuneration for risk-bearers is paid out in the form of units in an investment fund managed by Raiffeisen Kapitalanlage-Gesellschaft m.b.H. In addition, as required by law portions of the variable remuneration of risk-bearers are deferred and paid out over a period of several years.
- The supervisory board of Raiffeisen Kapitalanlage-Gesellschaft m.b.H. resolves the general remuneration policy principles specified by the remuneration committee, reviews them at least once a year and is responsible for their implementation and for monitoring of this issue. The supervisory board most recently fulfilled this duty on Nov 30, 2017. It has not identified any need for changes or any irregularities in relation to the remuneration policy of Raiffeisen Kapitalanlage-Gesellschaft m.b.H.
- In addition, at least once per year a central and independent internal review determines whether the company's remuneration policy has been implemented in accordance with the applicable remuneration regulations and procedures. The internal auditing division of Raiffeisen Kapitalanlage-Gesellschaft m.b.H. published its most recent report on Aug 28, 2018. This report has not resulted in any material findings concerning the remuneration policy of Raiffeisen Kapitalanlage-Gesellschaft m.b.H.

Audit opinion

Report on the annual fund report

Audit opinion

We have audited the annual fund report issued by Raiffeisen Kapitalanlage-Gesellschaft m.b.H., Vienna, for its fund Raiffeisen EuroPlus Bonds, consisting of the portfolio of investments as of August 31, 2018, the income statement for the financial year ending as of this date and the other disclosures required under Annex I Schedule B of the 2011 Austrian Investment Fund Act (Investmentfondsgesetz, InvFG).

In our view, the annual fund report complies with applicable statutory requirements and provides a true and fair view of the net assets and financial position as of August 31, 2018 as well as the earnings position for the fund for the financial year ending as of this date, in compliance with Austrian commercial law, the provisions of InvFG 2011.

Basis for the audit opinion

We performed our audit in accordance with § 49 (5) InvFG 2011 in accordance with Austrian principles of orderly auditing. These principles require application of the International Standards on Auditing (ISA). Our responsibilities on the basis of these requirements and standards are outlined in further detail in the "Responsibilities of the auditor for the audit of the annual fund report" section of our audit certificate. We are independent from the company, in compliance with Austrian commercial law and professional standards, and we have fulfilled our other professional duties in accordance with these requirements. In our view, we have obtained sufficient and suitable audit documentation as a basis for our audit opinion.

Responsibilities of the company's legal representatives and the supervisory board for the annual fund report

The company's legal representatives are responsible for the preparation of the annual fund report and for ensuring that it provides a true and fair view of the fund's net assets, financial and earnings position in compliance with Austrian commercial law and the provisions of InvFG 2011. The company's legal representatives are also responsible for the internal controls which they deem necessary in order to enable the preparation of an annual fund report which is free from material (intentional or unintentional) misrepresentations.

The supervisory board is responsible for monitoring the company's accounting process in relation to the funds under its management.

Responsibilities of the auditor for the audit of the annual fund report

Our goals are to establish sufficient certainty as to whether the annual fund report as a whole is free from material (intentional or unintentional) misrepresentations and for issuing an audit certificate which includes our audit opinion. Sufficient certainty means a high level of certainty – but not a guarantee – that an orderly audit performed in accordance with the recognized Austrian principles – which require application of the ISA – will always uncover any material misrepresentation. Misrepresentations may result from malicious acts or on the basis of errors and will be deemed material where they may be reasonably expected – either individually or collectively – to influence the economic decisions made by users on the basis of this annual fund report.

As part of an audit complying with the recognized Austrian principles of orderly auditing – which require application of the ISA – we exercise due discretion throughout our audit and maintain a critical distance.

In addition, the following applies:

- We identify and evaluate the risks of material (intentional or unintentional) misrepresentations in the annual fund report, plan audit activities in response to these risks, implement these activities and obtain audit documentation which is sufficient and suitable in order to serve as a basis for our audit opinion. The risk of material misrepresentations resulting from malicious acts not being uncovered is greater than the risk resulting from errors, since malicious acts may include fraudulent collaboration, falsifications, deliberate incompleteness, misleading representations or the suspension of internal controls.
- We obtain a picture of the internal control system which is relevant for the audit so as to plan audit activities which are adequate in the given circumstances, but not with the objective of providing an audit opinion regarding the effectiveness of the company's internal control system.
- We evaluate the adequacy of the accounting methods applied by the company's legal representatives as well as the reasonableness of the legal representatives' estimates in the accounting as well as the related disclosures.
- We evaluate the overall picture, the structure and the contents of the annual fund report including the disclosures and whether the annual fund report provides a true and fair view of the underlying business transactions and events.
- We discuss matters with the supervisory board including the planned scope of the audit and its schedule as well as significant audit findings, including any significant shortcomings in the internal control system that we identify in the course of our audit.

Our audit opinion for the annual fund report does not cover this other information, and we do not provide any sort of assurance in this regard.

In connection with our audit of the annual fund report, we are responsible for reading this other information and for considering whether there are any material inconsistencies between this other information and the annual fund report or on the basis of our knowledge obtained in the course of our audit or whether this information appears to have been otherwise materially misrepresented.
